PROFESSIONAL SUMMARY

Full Stack Engineer with 3+ years of experience designing and building scalable web applications using React, Angular, Node.js, and Python. Skilled in REST API development, microservices architecture, and cloud deployment on AWS (EC2, S3, Lambda). Experienced in building search systems with Elasticsearch, optimizing databases (MongoDB, MySQL), and implementing CI/CD pipelines for automated deployments. Strong background in performance optimization, backend architecture, and delivering production-grade applications in agile environments.

Core Competencies: Full Stack Development | REST API Design | Microservices Architecture | Cloud Deployment | Database Optimization | Performance Optimization | Agile Development | Code Reviews

TECHNICAL SKILLS

Frontend:	React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, Python, FastAPI, REST API Development, Microservices, Authentication & Authorization (JWT / OAuth)
Databases:	MongoDB, MySQL, Elasticsearch — Query Optimization, Indexing, Data Modeling, Scalable Architecture
Cloud & DevOps:	AWS (EC2, S3, Lambda), Docker Containers, CI/CD Pipelines, Linux Server Administration, Apache, Nginx
Tools:	Git, GitHub, Postman, VS Code, Angular Native (Mobile), Chart.js, ApexCharts, ECharts

PROFESSIONAL EXPERIENCE

Full Stack Developer	March 2025 – Present
Taxmann Technologies New Delhi	
- Led frontend development using Angular and React, delivering responsive and accessible interfaces for multiple enterprise products, improving UI performance and maintainability. - Designed backend architecture for scalable REST APIs using Node.js and FastAPI, supporting complex data workflows and multiple product integrations. - Implemented Elasticsearch-based full-text search, enabling scalable, high-speed querying across large datasets and reducing search response time. - Designed and optimized MongoDB and MySQL schemas, improving query performance and supporting scalable backend services. - Participated in agile development — code reviews, sprint planning, and end-to-end feature delivery with cross-functional teams.	
Full Stack Developer (Project Engineer III)	Aug 2023 – Mar 2025
Oges Solutions Gurugram, India	
- Delivered 7+ full-stack web applications using MERN stack and Angular, improving client delivery timelines and application scalability. - Designed backend architecture and REST APIs using Node.js and Express.js, implementing authentication and authorization (JWT) for secure user access. - Managed cloud server deployments on AWS (EC2, S3), applying performance optimization and security best practices across production environments. - Designed and maintained MySQL databases with optimized queries and indexing strategies, ensuring reliable data management for production systems. - Integrated CI/CD pipelines, reducing manual deployment overhead and improving release frequency and team collaboration. - Automated server-side operations using cron jobs and shell scripts, reducing manual effort and improving system performance.	

Web Developer (Project Engineer)

Nov 2022 – Jul 2023

Oges Solutions | Gurugram, India

- Built and maintained dynamic web applications using PHP, Angular, HTML, and CSS, contributing to 7+ successful client projects.
- Managed and optimized MySQL databases for efficient data storage and retrieval, supporting high-performance application functionality.
- Designed responsive, user-friendly interfaces that improved user engagement and experience across multiple platforms.
- Automated server-side processes with cron jobs and shell scripts, improving operational efficiency and reducing error rates.
- Conducted thorough testing and debugging to ensure application quality, performance, and adherence to industry standards.

KEY PROJECTS

Task Management Application

Jan 2025 – Present

React, Node.js, Express.js, MongoDB, Tailwind CSS, Chart.js

- Developed a full-stack task management platform using React, Node.js, Express, and MongoDB, enabling real-time task tracking and team collaboration.
- Implemented role-based access control (RBAC) and secure REST APIs, supporting multi-user workflows with JWT authentication.
- Built interactive dashboards using Chart.js for visualizing team productivity, task completion rates, and workload distribution.

Heavy Vehicle Management System

May 2024 – Aug 2024

Angular, FastAPI, MySQL, Angular Native, GPS APIs

- Designed and built a full-stack logistics platform with real-time vehicle tracking, load request management, and route optimization.
- Developed a mobile application using Angular Native, enabling drivers and managers to access tracking and logistics features on the go.
- Architected a FastAPI backend with MySQL for transactional data management; integrated third-party GPS APIs for live location updates.

Data Analytics & Visualization Platform

Dec 2023 – Apr 2024

Angular, FastAPI, MySQL, ApexCharts, Chart.js, ECharts, Apache, CI/CD

- Built a full-stack analytics platform with an interactive public dashboard featuring real-time charts, custom filters, and data export.
- Implemented secure organizational data input with real-time public visualisation and live data refresh capabilities.
- Deployed on Apache with automated CI/CD pipelines, ensuring high availability and zero-downtime cloud deployments.

EDUCATION

Master of Computer Applications (MCA)

Graduated: August 2022

Dr. Shyama Prasad Mukherjee University, Ranchi

CERTIFICATIONS

- Web Development Training — Internshala Training
- Web Development Course — Technophilia Summer Training
